

Varied Fluency

Step 1: Measure Length

Teaching note: Please note that precise measurements are dependent upon printer settings. Two of the questions require children to measure, therefore children must be provided with a ruler.

National Curriculum Objectives:

Mathematics Year 3: (3M2a) [Measure lengths \(m/cm/mm\)](#)

Differentiation:

Developing Questions to support measuring in millimetres (mm) or centimetres (cm) only.

Expected Questions to support measuring in millimetres (mm), centimetres (cm) and metres (m) with some mixed units, using increments of 1cm and 1mm. Objects placed at different positions on the ruler.

Greater Depth Questions to support measuring in millimetres (mm), centimetres and metres (m) with mixed units, using increments of 1cm and 1mm. Objects placed at different positions on the ruler, with some increments not shown.
