## Varied Fluency <br> Step 1: What is Volume?

## National Curriculum Objectives:

Mathematics Year 5: (5M8) Estimate volume [for example, using 1 cm 3 blocks to build cuboids (including cubes)] and capacity [for example, using water]

## Differentiation:

Developing Questions to support measuring volume in $\mathrm{cm}^{3}$, up to $12 \mathrm{~cm}^{3}$, using cubes/cuboids or liquid volumes where scales are in multiples of 10 or 100 and measurements fall on marked increments.
Expected Questions to support measuring volume in $\mathrm{cm}^{\mathbf{3}}$, up to $\mathbf{2 4} \mathrm{cm}^{\mathbf{3}}$, using cubes/cuboids or liquid volumes where scales are in multiples of 10 or 100 but not all increments are marked.
Greater Depth Questions to support measuring volume in $\mathrm{cm}^{3}$ up to $24 \mathrm{~cm}^{3}$ using compound 3D shapes or liquid volumes where scales are in multiples of 10 or 100 but not all increments are marked and some measurements fall between increments.
